Hi Joelle:

Could you please send me the form on Microsoft Word MR-EXP-Amend. We have been assigned the exploration project number E/049/051. We would like to add to this some land adjacent to the original permit which is on a Trust Land's lease we have. I have ordered a bond now to cover these properties and hope to have the MR-EXP-Amend for in to you asap. SITLA has already approved our request for exploration and given us a clearance from the Division of State History. I'll be sending a copy of that letter also with the MR-EXP-Amend. It will only add .05 more acres to the exploration trenches.

Also, I have been spoken to Doug and Lynn about getting the MR-REV turned in to them for our Jim Gay Mine. I hope to get this turned in next week. Doug asked if I would write this to him in a note. Can you please print this email out and hopefully that will cover this request. As I told Lynn yesterday, I have completed the form, completed the transects of the before and after pit crossection drawings, completed the vegetation survey. All I am doing now is putting it all together -----just wrapping it all up.

Thank you,

Sincerely,

John Hewitt
